RE: Membranes for Systems with a Z-Brane

If you are ordering a membrane for a Z-brane system you will need to order FT-MB-20FZ for 20 inch membranes or FT-MB-40FZ for 40 inch membranes. These membranes have larger diameter holes in the end of the membrane to accommodate the Z-Brane rod.

All other replacement membranes should be FT-MB-20F for a standard 20 inch membrane or FT-MB-40F for a standard 40 inch membrane.

Please contact Tech Support at 415-526-2780 with any questions or concerns regarding this matter.
