Replacement Part Number for all 12/24V Diversion Valves

KIT-MNF-BURDV12

DIVERSION VALVE MANIFOLD CONVERSION SP TO BK 12V

Alcon/ECI 'round' diversion valves were used for many years on Spectra systems before being replaced by Spartan in 2015, which used a conversion kit with adapter. In 2018, Burkert diversion valves then replaced Spartan as standard parts on all Marine systems. It is preferable and the factory recommendation to replace any failed diversion valves with a Burkert conversion kit.

➤ **KIT-MNF-BURDV12**

Kit Contents:

- Burkert DVLV Solenoid (PL-SLN-1/4D12M)
- Current Production Product Manifold
- 1/4" Check Valve
- Mounting Bracket
- Necessary plumbing fittings & tubing

Advantages:

- Manual Override Twist-Lock Button.
 - No more changing tubing to bypass solenoid during manual system operation
- Highly reliable quality manufactured in Germany. Conforms to current production quality standards.
- Can be retrofitted to any Spectra system within the past 15 years
